

# ACCELERATING INNOVATIONS IN FLEXIBLE PACKAGING

The logo for CMYK Polymers is centered within a large black circle with a white border. Above the text "CMYK" are seven vertical bars of different colors: blue, cyan, magenta, yellow, black, green, and light green. Below "CMYK" is the word "POLYMERS" in a white, sans-serif font.

# Technology

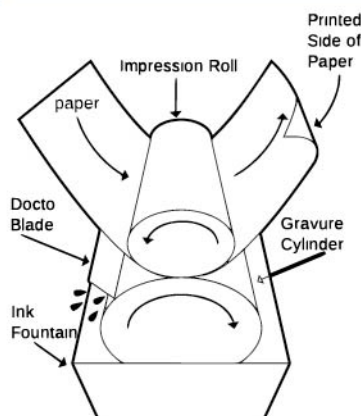

At par with international standards. We understand that every client's need is different and it is our responsibility to fulfil them by providing wide range and customised packaging solution suited to specific needs. Therefore, we do all kinds of printing and packaging ranging from the most basic to the advanced.

## 1. DESIGNING

Our team knows exactly how the demands of brand owners concerning print results develop and always find the ideal future-oriented solutions.

## 2. CYLINDER

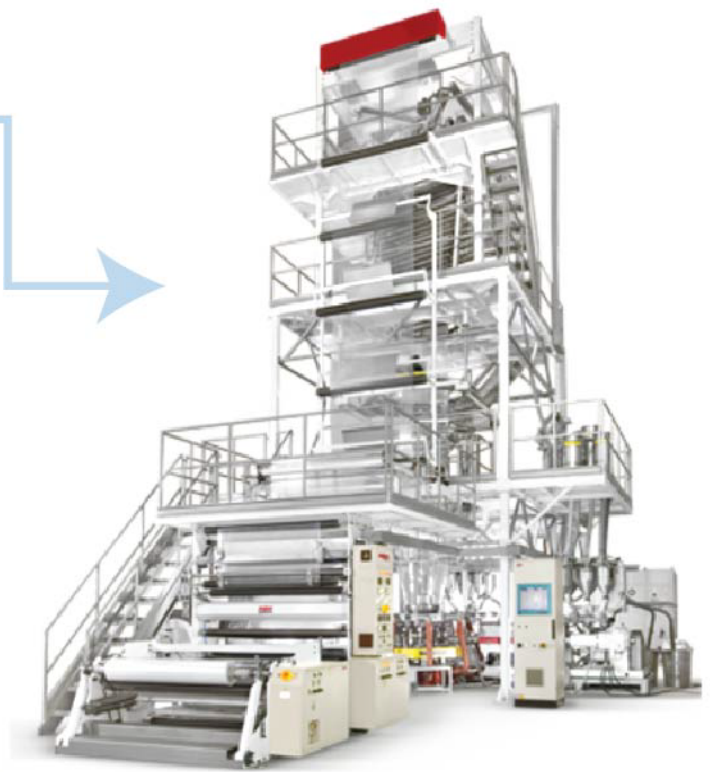

We procure a complete line of solution with state-of-the-art electronic engraving facility in a centrally air-conditioned dust free atmosphere for superior results.

### 3. FILM PRODUCTION

Multifoil – 3 layer blown film lines are available with advanced automation features like integrated material conveying, gsm control, gravimetric blending and dosing, non-contact type IBC system with digital correction, automatic thickness control, fully automatic center-gap-surface winder and integrated process control.

### 4. INSPECTION

We have a complete range of in-line inspection systems for foil and flexible packaging printing. Suitable inspecting any type of narrow- to mid-web products - including transparent or metalized labels, flexible material or film -, we perform a 100% print inspection, and provide an efficient job mix-up prevention tool. We are sure to deliver exactly what our customers expect, and avoid customer reclamations or product recalls.

## 5. LAMINATION

With Nord Meccanica

**Super Simplex SL** Compact laminator We guarantee extremely high production and quality standards.

## 6. SLITTING

Our Slitter Rewinder allows larger reel diameters by accommodating the unwind and duplex rewind sections on either side of a common frame. The rolls are 100% accurate.

## 7. POUCHING

We are the leading Pouch Manufacturers of Delhi (NCR). Printed/Unprinted flexible laminates in pouch form or roll form is the unique proposition of CMYK Polymers. We are engaged in manufacturing and supplying a comprehensive array of **Specialized Packaging Pouches, Aluminium Foil Laminates, Custom Printed Pouches, Kraft Paper Pouches, Standup Pouches, ZIPPER/ZIPlock Pouches, Spout Pouches, and Shaped Pouches** etc.

We very well understand the needs of various industries like Pharmaceutical, Food & Beverages, Confectionery, Home Care, Personal Care, and Automobiles etc. Not only large potential customers, we can even cater smaller quantities to niche markets by our readymade stock pouches in different sizes & structures.

## 9. END PRODUCT

We offer you a wide range of packaging materials with various barrier properties for different groups of food, chemical and industrial products.

Our experienced production engineers can match the exact combination of the printing technologies and materials to ideally meet your draft on the base of printing quality, eye appeal and cost. Deep knowledge of the printing processes is the guarantee of the exact transfer of the labelling or packing image from the PC display onto the real material.

Realize your own ideas with the help of our printing technologies!

# Collaborate Innovate Accelerate

## From A To Z Or Whatever You Like

The specialists at CMYK polymers have brought through sands of project to life and have developed tailored packaging solutions using plastic films and paper drawing on a vast array of pouches , sleeves , sacks and carrier bags as well as food shrink-wrap and special films made of polythene & plastic composites
